

SD 450 body-armour apron for humanitarian demining

Our popular SD 450 demining body-armour (NATO STANAG 2920 V50 – 450m/s) extends tailored protection over the deminer's frontal thighs while still being comfortable to walk and kneel in.

With a multi-layer Kevlar/polyamide inner inside a removable washable Cordura® textured nylon cover that is exceptionally long-lasting and resistant to tears and abrasions, it is lighter than many alternatives at 3.4 kg.

The design includes a useful chest pocket - because access to other pockets is restricted after the apron is fastened.

Designed to interface with the SD Visor range, the collar overlaps the visor when looking down, but allows full head movement side-to-side when looking up.

The SD 450 body-is adjusted to fit using simple webbing straps and clips.

Colours may vary between dye lots.

SD Part no.: SKU2015

NOTE: Like most other PPE, SD armour is designed to be water-resistant. Users should avoid getting the core of any armour wet because this can reduce the protection it offers. If the core of armour gets wet, allow the garment to dry naturally before use. Do not tumble-dry or expose to heaters.
